DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1,2,3,10,18, drawn to a laser marked product, classified in class 428, subclass 195.

II. Claims 4-9,11-17,19-25 , drawn to a method of laser marking, classified in class 219, subclass 121.85.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II, a method of laser marking and Group I, a laser marked product are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the marked product can be made by applying a layer of mixed metal oxide followed by treatment using an electron beam, plasma from a plasma torch, or an electric discharge machining process.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

a. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
